

Naturich's K★9 Finest® Dietary Gel Supplement

*The Working Dog's Daily Supplement
with the Amaferm® Advantage*

Recovery from physiological
trauma or stress is an
absolute requirement when
working to restore general
animal well being.

SCIENTIFICALLY FORMULATED TO SPEED THE HEALING PROCESS

It is well understood that the best medicines and treatments money can buy are severely affected by the ability or inability of a canine to contribute to its recovery. Significant factors affecting this process are the canine's condition and/or ability to adequately digest and absorb nutrients essential to the recovery process.

Naturich's K★9 Finest® Dietary Gel

is a complete nutritional aid,
scientifically formulated to
further strengthen a canine's
ability to speed its own
healing process.

What value does it have in the canine?

- 🐾 Stress from travel, street encounter
- 🐾 Diarrhea
- 🐾 Digestive upset
- 🐾 Stress of training
- 🐾 Change of water source
- 🐾 Sickness
- 🐾 Antibiotic therapy
- 🐾 Sudden changes of diet
- 🐾 Surgery Recovery, C-section
- 🐾 Vaccination program, worming
- 🐾 Stress of Certification, Competition

Naturich's K★9 Finest® Dietary Gel can assist in the recovery process by providing a canine with essential nutrients required to drive faster healing, while jump-starting the digestive function of the gut. The key nutrients included in **Naturich's K★9 Finest® Dietary Gel** have been scientifically proven to provide the following benefits:

- 🐾 Amaferm® – an all-natural feed additive resulting from the controlled fermentation of a proprietary strain of *Aspergillus oryzae*. The product has been validated, in multiple controlled studies, to significantly increase the digestion of fiber and the absorption of essential nutrients within the gut. Unlike probiotic-based digestive aids, Amaferm works effectively in the presence of antibiotics.
- 🐾 MannanOligosaccharide (MOS) – a yeast cell wall component that research has proven to be of significant value. Its primary benefits include the neutralization of harmful pathogens as well as immune stimulation within the intestinal tract.
- 🐾 Key vitamins such as E, A, D3 and B12 are essential to drive critical metabolic functions such as tissue repair and immunocompetency..
- 🐾 Key macro and micro minerals are included with attention to both the balance and form of the trace minerals (chelated forms) included to optimize immune response and tissue repair.

NOT A YEAST OR PROBIOTIC. WORKS IN CONJUNCTION WITH ANTIBIOTICS

NATURICH'S K★9 FINEST® DIETARY SUPPLEMENT

NEW GEL. SAME GREAT RESULT

Naturich's K★9 Finest® Dietary Supplement Gel has the same ingredient profile as the former Naturich's K★9 Finest® Dietary Supplement Gel, with the addition of a natural peanut butter flavor for color and palatability. However, the new water-based gel formula has an improved consistency, is easier to administer than the previous paste and has increased palatability.

The water-based gel should glide out the tube with more ease than the paste, and it is designed to withstand temperature up to 212-degrees Fahrenheit.

Naturich's K★9 Finest® Dietary Supplement Gel contains Amaferm®, a precision-based prebiotic that is research-proven to keep the gut balanced and efficient during stress as well as maintain feed and water intake. The Dietary Supplement Gel also contains MOS to trap and expel pathogens, limiting their ability to do harm. The gel comes in a 15 mL tube.

It is best to use the Naturich's K★9 Finest® Dietary Supplement Gel anytime your dog is performing if it is training, on the street or hunting dog; before and after antibiotic treatment, worming or surgery, during sickness, vomiting or diarrhea.

Naturich's K9 Finest Dietary Paste is the most AMAZING product of its kind on the market! I'm a handler with multiple Belgian Malinois' performing daily patrols, travel, training, certifications and all variations of stressful situations for me, my partner(s) and trainees. This is the one product we could never be without. It works...and FAST!
